### **CZ-USA - 1012 Shotgun**

- **12-gauge 28" Barrel**
- **Quantity: 2**
- **Value: \$645**
- **Description:** The latest evolution in our semi-automatic shotgun line, the 1012 uses a gas-less inertia operating system. Instead of redirecting gas from the barrel to run the action, the 1012 uses a spring within the bolt to store energy during the shotgun's recoil, spending this energy a split second later to rotate and unlock the twin lugs from the barrel extension and withdraw the spent shell. ### **Federal Premium Ammo - Conceal Carry Backpacks**

- **Limited Edition Conceal Carry Backpacks**
- **Quantity: 3**
- **Value: \$200 each**
- **Brand Description:** Technology is the lifeblood of Federal Ammunition, and it's been pumping through our veins since 1922. That's when our founding president, Charles L. Horn, started a culture of innovation that has guided everything we've done for nearly a century, turning a company that began humbly in Anoka, Minnesota, into one of the world's largest producers of sporting ammunition. It's led to the development of thousands of specialized, high-quality shotshell, centerfire and rimfire loads for hunters and shooters. It's instilled manufacturing and quality control processes that have made our ammunition the most trusted in the industry. [FederalPremium.com](http://FederalPremium.com)

### TriStar Arms - Raptor Semi-Auto

- **Black Synthetic, 12-gauge, 28" Barrel**
- **Quantity: 1**
- **Value: \$455**
- **Description:** The Raptor is a semi-automatic shotgun that allows you to shoot light target loads to heavy waterfowl loads. Removable choke system that uses Beretta Mobile threads includes three choke tubes (IC, M, F), choke box and choke wrench. Highly durable injection molded stock and forearm, stock has zero plane for better feel. Fiber optic sight and swivel studs standard with rubber recoil pad, backed by a five-year mechanical warranty. The shotgun is gas operated semi-automatic. The bolt remains open after last round is fired. If the magazine and chamber are both loaded, opening action will result in ejecting shell from chamber but will not cycling new shell from magazine into the chamber. The magazine cut-off is located near trigger guard and must be pushed to eject shell from magazine. This allows shooter to clear chamber but keep magazine loaded.
